

Say It Yourself

WisdomForge Booklet — Ages 11–14

Say It Yourself

WisdomForge Booklet — Ages 11–14

About This Book

This is not a phrasebook and it is not an app. A talking tool already speaks every tongue you can name. This booklet teaches a slower thing: a mouth that moves before any speaker in a phone.

WisdomForge already has language Hour books when Michael drops them. Those are a different product. This booklet sits beside the six *Voice* sittings: Say It Yourself; Hear, Then Say; One Phrase That Is Yours; Ask Out Loud; Catch the Ghost-Speaker; and Speak First Capstone. Those sittings are live. This booklet is those six, told as one story you can hold.

You will hear Wilhelm von Humboldt on language as activity, not a finished work. You will hear lines from the academy sittings. Those lines are ours. We do not pretend a Stoic said them.

Each chapter has a story, words to remember, a big idea, something to try with a living mouth, and a question for the table. Phones wait. The person in the room is the judge.

The exam is being understood by a person. A generated paragraph is a costume.

Chapter 1: Say It Yourself

Illustration for Chapter 1

Ears first. Mouth second. That is not a slogan. It is a house rule.

A talking tool can say a word in any tongue. Pretty sound is not practice. Practice is air leaving your own mouth. In the academy sitting *Say It Yourself* (‘say-it-yourself’), the tool may be a second listen. It may not speak instead of you.

Hear a person or a short class recording — not a chatbot first. Pause. Say it. Say it again with the screen down. Then compare one sound if you must. Teachers can tell a generated paragraph. A grandmother can tell a mouth that never moved.

Wilhelm von Humboldt wrote that language is not a finished work (*ergon*) but an activity (*energeia*). A model gives you *ergon* — a finished object. Your mouth is *energeia*. If you only collect finished objects, you have stickers, not a tongue.

Do not mock accent. Native-smooth is not the week's goal. You are growing a mouth, not casting a voice actor.

Three original sentences. No generator. Say them. Ask about one pattern, not a rewrite of all three. Then say them again.

If you could not say it with the chat closed, it is not yours yet. Label drill versus your work. Generated speech in your name is a costume.

Medical and legal interpreting is a human interpreter. A model is not that.

Words to Remember

*"Language is not a product (*ergon*) but an activity (*energeia*)." — Wilhelm von Humboldt, *On Language* (1836)*

*"If your mouth didn't move, you didn't practice." — WisdomForge sitting *Say It Yourself**

Big Idea

Ears first. Mouth second. The target is a human ear, not a fluent waveform.

Try This

1. Write or choose one utterance. Say it twice with the screen down. Then one compare. Mute. Say it again. 2. Label MINE versus DRILL. Do not submit DRILL as your work. 3. If the tool offers a full spoken paragraph, close it.

Ask a Grown-Up

Who are we learning this language to speak to?

Chapter 2: One Phrase That Is Yours

Illustration for Chapter 2

Used, not displayed. That is not a slogan. It is a house rule.

A talking tool can say a word in any tongue. Pretty sound is not practice. Practice is air leaving your own mouth. In the academy sitting *One Phrase That Is Yours* (‘one-phrase-yours’), the tool may be a second listen. It may not speak instead of you.

Hear a person or a short class recording — not a chatbot first. Pause. Say it. Say it again with the screen down. Then compare one sound if you must. Teachers can tell a generated paragraph. A grandmother can tell a mouth that never moved.

Wilhelm von Humboldt wrote that language is not a finished work (*ergon*) but an activity (*energeia*). A model gives you *ergon* — a finished object. Your mouth is *energeia*. If you only collect finished objects, you have stickers, not a tongue.

Do not mock accent. Native-smooth is not the week's goal. You are growing a mouth, not casting a voice actor.

Three original sentences. No generator. Say them. Ask about one pattern, not a rewrite of all three. Then say them again.

If you could not say it with the chat closed, it is not yours yet. Label drill versus your work. Generated speech in your name is a costume.

Medical and legal interpreting is a human interpreter. A model is not that.

Words to Remember

*"Language is not a product (*ergon*) but an activity (*energeia*)." — Wilhelm von Humboldt, *On Language* (1836)*

*"If your mouth didn't move, you didn't practice." — WisdomForge sitting *Say It Yourself**

Big Idea

Try This

1. Write or choose one utterance. Say it twice with the screen down. Then one compare. Mute. Say it again. 2. Label MINE versus DRILL. Do not submit DRILL as your work. 3. If the tool offers a full spoken paragraph, close it.

Ask a Grown-Up

Who are we learning this language to speak to?

Chapter 3: Ask Out Loud

Illustration for Chapter 3

A question you can say is language. That is not a slogan. It is a house rule.

A talking tool can say a word in any tongue. Pretty sound is not practice. Practice is air leaving your own mouth. In the academy sitting *Ask Out Loud* ('ask-out-loud'), the tool may be a second listen. It may not speak instead of you.

Hear a person or a short class recording — not a chatbot first. Pause. Say it. Say it again with the screen down. Then compare one sound if you must. Teachers can tell a generated paragraph. A grandmother can tell a mouth that never moved.

Wilhelm von Humboldt wrote that language is not a finished work (*ergon*) but an activity (*energeia*). A model gives you *ergon* — a finished object. Your mouth is *energeia*. If you only collect finished objects, you have stickers, not a tongue.

Do not mock accent. Native-smooth is not the week's goal. You are growing a mouth, not casting a voice actor.

Three original sentences. No generator. Say them. Ask about one pattern, not a rewrite of all three. Then say them again.

If you could not say it with the chat closed, it is not yours yet. Label drill versus your work. Generated speech in your name is a costume.

Medical and legal interpreting is a human interpreter. A model is not that.

Words to Remember

*"Language is not a product (*ergon*) but an activity (*energeia*)." — Wilhelm von Humboldt, *On Language* (1836)*

*"If your mouth didn't move, you didn't practice." — WisdomForge sitting *Say It Yourself**

Big Idea

A question you can say is language. The target is a human ear, not a fluent waveform.

Try This

1. Write or choose one utterance. Say it twice with the screen down. Then one compare. Mute. Say it again. 2. Label MINE versus DRILL. Do not submit DRILL as your work. 3. If the tool offers a full spoken paragraph, close it.

Ask a Grown-Up

Who are we learning this language to speak to?

Chapter 4: Catch the Ghost-Speaker

Illustration for Chapter 4

A tool must not take your turn. That is not a slogan. It is a house rule.

A talking tool can say a word in any tongue. Pretty sound is not practice. Practice is air leaving your own mouth. In the academy sitting *Catch the Ghost-Speaker* (‘catch-the-ghost-speaker’), the tool may be a second listen. It may not speak instead of you.

Hear a person or a short class recording — not a chatbot first. Pause. Say it. Say it again with the screen down. Then compare one sound if you must. Teachers can tell a generated paragraph. A grandmother can tell a mouth that never moved.

Wilhelm von Humboldt wrote that language is not a finished work (*ergon*) but an activity (*energeia*). A model gives you *ergon* — a finished object. Your mouth is *energeia*. If you only collect finished objects, you have stickers, not a tongue.

Do not mock accent. Native-smooth is not the week's goal. You are growing a mouth, not casting a voice actor.

Three original sentences. No generator. Say them. Ask about one pattern, not a rewrite of all three. Then say them again.

If you could not say it with the chat closed, it is not yours yet. Label drill versus your work. Generated speech in your name is a costume.

Medical and legal interpreting is a human interpreter. A model is not that.

Big Idea

A tool must not take your turn. The target is a human ear, not a fluent waveform.

Try This

1. Write or choose one utterance. Say it twice with the screen down. Then one compare. Mute. Say it again. 2. Label MINE versus DRILL. Do not submit DRILL as your work. 3. If the tool offers a full spoken paragraph, close it.

Ask a Grown-Up

Who are we learning this language to speak to?

Chapter 5: Mouth First, Then the Tool

Illustration for Chapter 5

The pile is a person. The judge is still a mouth. That is not a slogan. It is a house rule.

A talking tool can say a word in any tongue. Pretty sound is not practice. Practice is air leaving your own mouth. In the academy sitting *Mouth First, Then the Tool* (‘speak-first-capstone’), the tool may be a second listen. It may not speak instead of you.

Hear a person or a short class recording — not a chatbot first. Pause. Say it. Say it again with the screen down. Then compare one sound if you must. Teachers can tell a generated paragraph. A grandmother can tell a mouth that never moved.

Wilhelm von Humboldt wrote that language is not a finished work (*ergon*) but an activity (*energeia*). A model gives you *ergon* — a finished object. Your mouth is *energeia*. If you only collect finished objects, you have stickers, not a tongue.

Do not mock accent. Native-smooth is not the week's goal. You are growing a mouth, not casting a voice actor.

Three original sentences. No generator. Say them. Ask about one pattern, not a rewrite of all three. Then say them again.

If you could not say it with the chat closed, it is not yours yet. Label drill versus your work. Generated speech in your name is a costume.

Medical and legal interpreting is a human interpreter. A model is not that.

Words to Remember

*"Language is not a product (*ergon*) but an activity (*energeia*)." — Wilhelm von Humboldt, *On Language* (1836)*

*"If your mouth didn't move, you didn't practice." — WisdomForge sitting *Say It Yourself**

Big Idea

Ask a Grown-Up

Who are we learning this language to speak to?

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (1)

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (2)

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (88)

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (89)

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (100)

Humboldt's distinction still holds when we say it again: the product on the screen is not the activity in the mouth. The sitting says the tool may listen second. It may not speak instead. A house that never speaks will not get a language from an app. (101)

Why the mouth is the exam

A generated paragraph in Spanish is a costume. A sentence you can say to a human is the language. Humboldt called language activity, not a finished work. WisdomForge sittings already say: if your mouth didn't move, you didn't practice. The tool may drill conjugation after you have tried. It may compare pronunciation after you have recorded yourself. It may not be the speaker.

Teachers can tell. More important: the grandmother can tell. Live interpreting for family in medical or legal settings needs a human interpreter. A model is not that.

Conversation is time-bounded. A model that will wait forever while you craft a perfect subjunctive is not conversation. It is composition. Both have a place. Only one transfers to the street, the interview, and the dinner.

Heritage speakers: do not police their home register with a model's correctness. You are not the academy of the language they already live in. You are a house practicing another tongue, or keeping one.

If they feel shy, shy mouths still move. If they want the tool because it sounds more native, they are not casting a voice actor. Native-smooth is not the week's goal.

Closed chat is the exam. Open chat is rehearsal if you already spoke. Ghost-speakers fail at the border. Own a core. Tools around it, not instead of it.
